

user Updating booking taskflow

Anjali Manoj

Goal: User can successfully update their booking

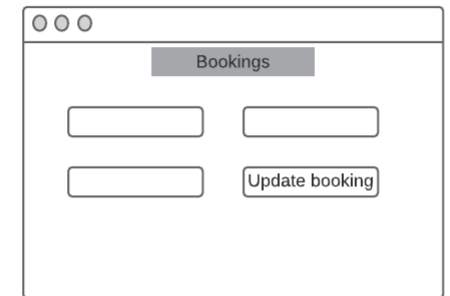

Home page where they can access the login button

Login with username and password

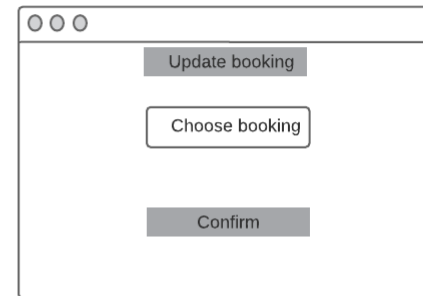

After login is successful, user is redirected to their homepage where they can access the booking button

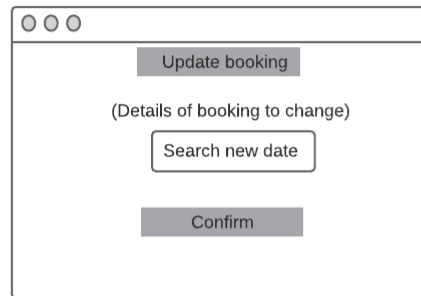

From here, user can choose to update a booking

finalise the date.

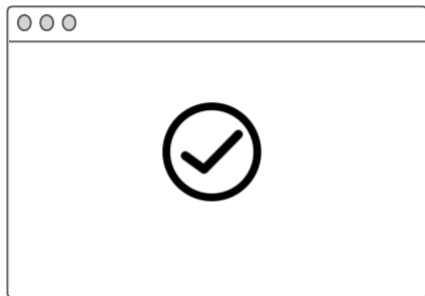

User can search up the booking they've made and confirm the date they want to update

This section links to the graphical visualization of the room and desks for choosing a new booking

The system shows the details of the booking they want to change and lets user choose a new available date

The update is confirmed by the system
