

admin_generate_report_with_date_taskflow

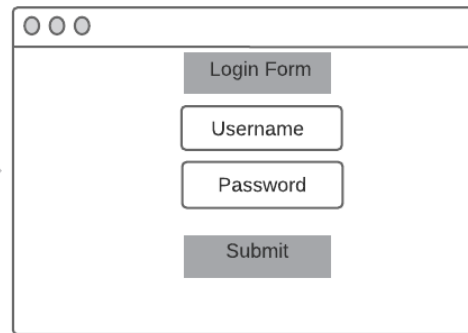

Anjali Manoj

Goal: Admin can generate a CSV report from booking with date

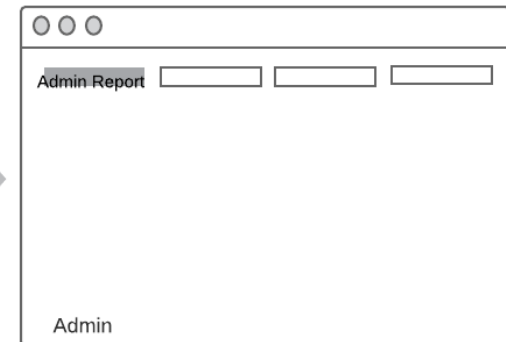

A browser window mockup showing a home page. It has a 'Home' link, a 'Login' button, and a text input field. Below these are two horizontal bars representing content.

Home page where they can access the login button

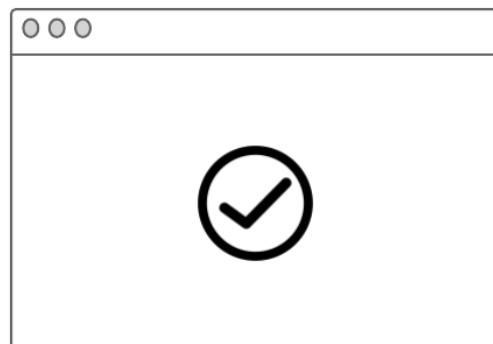

A browser window mockup showing a login form. It has a 'Login Form' header, 'Username' and 'Password' input fields, and a 'Submit' button.

Login with username and password

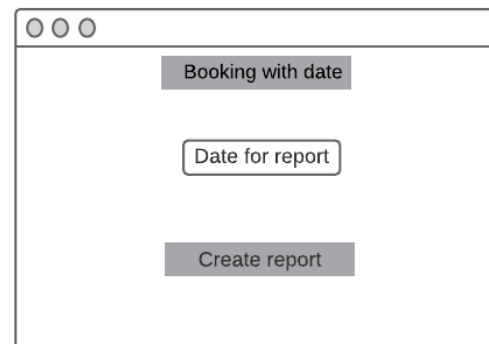

A browser window mockup showing an admin dashboard. It has an 'Admin Report' header with three input fields, and an 'Admin' label at the bottom.

After login is successful, admin is redirected to their homepage where they can access the 'admin report' button

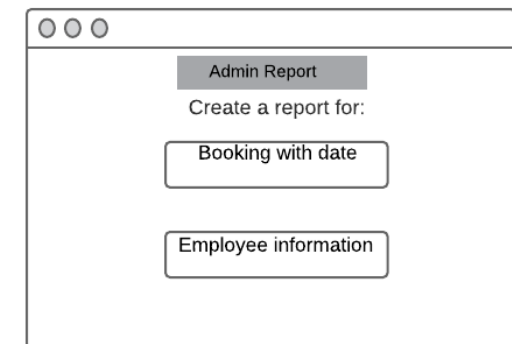

A browser window mockup showing a success message. It features a large checkmark icon inside a circle.

System successfully generates a CSV report from booking with date.

A browser window mockup showing a 'Booking with date' form. It has a 'Booking with date' header, a 'Date for report' input field, and a 'Create report' button.

Admin can choose the date the want to create the report for

A browser window mockup showing an 'Admin Report' form. It has an 'Admin Report' header, a 'Create a report for:' label, and two radio button options: 'Booking with date' and 'Employee information'.

From here admin can choose to create a report for the 2 choices
