

admin_reject_confirm_booking_taskflow

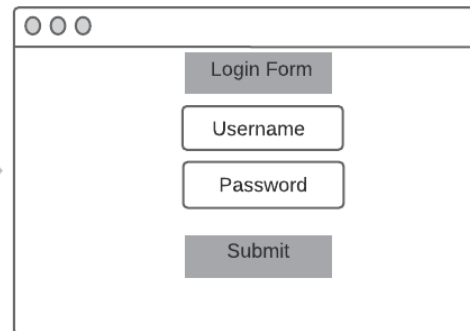

Anjali Manoj

Goal: Admin can choose to reject or confirm booking that have been made.

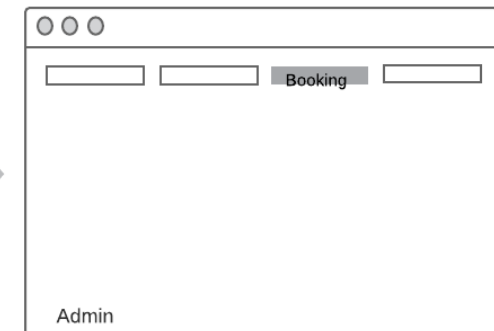

A browser window mockup showing a 'Home' page. It features a 'Login' button and an empty text input field. Below these are two horizontal lines representing additional content or a list.

Home page where they can access the login button

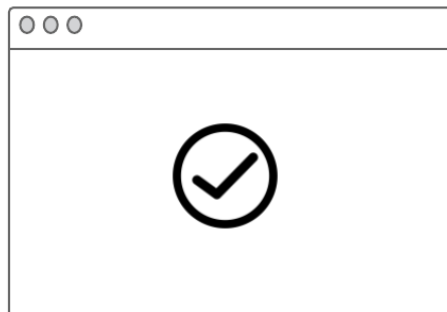

A browser window mockup showing a 'Login Form'. It contains a 'Username' input field, a 'Password' input field, and a 'Submit' button.

Login with username and password

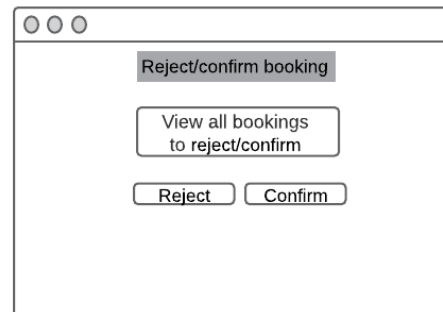

A browser window mockup showing an 'Admin' dashboard. It includes a 'Booking' button and several empty input fields for data entry.

After login is successful, admin is redirected to their homepage where they can access the 'booking' button

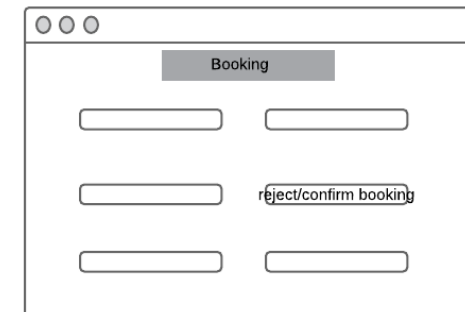

A browser window mockup showing a large checkmark icon inside a circle, indicating a successful operation.

The system saves the decision

A browser window mockup showing a 'Reject/confirm booking' interface. It includes a 'View all bookings to reject/confirm' button and 'Reject' and 'Confirm' buttons.

From here, admin can choose to either reject or confirm bookings.

A browser window mockup showing a 'Booking' management interface. It features a 'reject/confirm booking' button and several input fields for managing booking details.

From here, user can choose to Edit booking condition, make booking, cancel, view, update, reject/confirm booking
